Portfolio: kjtabinas.online | LinkedIn: linkedin.com/in/kjtabinas/

PROFESSIONAL SUMMARY

AI Automation Engineer specializing in designing and deploying production-ready workflow automations, AI agents, and API integrations. Experienced in building internal business systems, automating operational workflows, integrating third-party services using REST APIs, webhooks, and MCP, and rapidly shipping solutions using modern AI-assisted development tools including Claude Code, ChatGPT, and Gemini. Comfortable owning projects end-to-end, learning new platforms quickly, and building scalable automations with minimal supervision.

WORK EXPERIENCE

AI Automation Engineer | Business Systems Engineer

Dec 2025 – Present

Luxe Signature Holiday Homes / Real Estate

- Independently designed, developed, and deployed AI-powered business systems that streamlined operations across multiple departments.
 - Luxe Property Management Software
 - Designed and developed a complete Property Management System for holiday homes and long-term rentals.
 - Built modules for lease management, tenant onboarding, landlord management, payments, invoices, document requests, approvals, dashboards, and reporting.
 - Integrated REST APIs, databases, cloud storage, and workflow automations to eliminate manual processes.
 - Developed AI-assisted features using Claude Code, ChatGPT, and Model Context Protocol (MCP).
 - Luxe Signature Holiday Homes Website
 - Designed, developed, and maintained the company's official website.
 - Improved website performance, SEO, user experience, and property inquiry workflows.
 - Integrated business systems and automated property listing management.
 - HRIS Portal
 - Designed and developed a complete Human Resource Information System (HRIS) from scratch.
 - Built attendance synchronization, leave management, payroll workflows, employee records, document management, approval workflows, and employee self-service modules.
 - Automated HR operations through workflow automation, notifications, and digital approval processes.
- Additional Responsibilities
 - Built workflow automations and AI agents using Claude Code, ChatGPT, MCP, and modern AI development tools.
 - Developed REST API integrations, webhooks, and business system connections.
 - Created internal dashboards, reporting tools, and operational analytics.
 - Collaborated directly with management to gather requirements and independently deliver production-ready software solutions.
 - Maintained, optimized, and documented internal business applications and automation workflows.

Business Systems & IT Administrator

April 2025 – Dec 2025

Suliter International Building Materials Trading L.L.C

- Developed internal automation tools that reduced manual administrative work.
- Built approval workflows, document generation, and reporting systems for operations.
- Developed business applications to streamline quotations, purchase orders, inventory, and collections.
- Automated repetitive Excel processes using formulas, VBA, and workflow automation.

- Designed internal dashboards for sales, inventory, and financial reporting.
- Maintained company IT infrastructure, user accounts, printers, networks, and business systems.
- Integrated AI tools into daily business operations to improve productivity and reduce manual work.
- Provided technical support and system troubleshooting for company hardware and software.

IT Administrator / Flutter Developer

Feb 2024 – Feb 2025

GC&C Group of Companies – Cleverminds Digital Solutions Inc.

- Designed and developed a cross-platform Parking Management mobile application using Flutter, enabling real-time parking availability, QR-based access, and user-friendly booking workflows.
- Integrated REST APIs and backend services to support real-time data synchronization and seamless communication between the mobile application and server.
- Developed responsive user interfaces and optimized application performance for Android and iOS platforms.
- Implemented state management, application testing, debugging, and version control to ensure software quality and maintainability.
- Administered and maintained the company's IT infrastructure, including hardware, software, user accounts, and network systems.
- Provided technical support, system troubleshooting, software installation, and routine maintenance to ensure business continuity.
- Maintained IT asset inventory, system documentation, and data backup procedures while supporting day-to-day technology operations.

DX Solutions Developer (Power Platform)

July 2023 – Dec 2023

Lexmark International Philippines

- Designed and developed enterprise business applications using Microsoft Power Apps to digitize and streamline internal business processes.
- Built automated workflows using Microsoft Power Automate, reducing manual effort and improving operational efficiency across multiple departments.
- Developed interactive Power BI dashboards to provide real-time reporting, KPI tracking, and business insights for stakeholders.
- Integrated business applications with Microsoft 365 services, SharePoint, Excel, and SQL databases to improve data accessibility and workflow automation.
- Collaborated with cross-functional teams to analyze business requirements and deliver scalable low-code solutions.
- Performed system testing, troubleshooting, maintenance, and continuous improvements to ensure application reliability and performance.

IT Operations & Automation Specialist – Virtual Assistant

Feb 2023 – April 2025

YLifestyle Design & Management – US Client Based

- Supported property management operations by administering AppFolio and maintaining accurate tenant, lease, owner, and financial records.
- Automated operational reports, KPI dashboards, owner statements, and recurring business processes using Microsoft Excel and workflow automation.
- Developed and maintained internal websites, business tools, and process improvements to increase operational efficiency.
- Managed IT operations, user support, software administration, and technical troubleshooting for remote teams.
- Built automated reporting solutions for collections, financial performance, occupancy, and property management metrics.
- Assisted in website management, SEO optimization, and digital content updates to improve online visibility.
- Coordinated with executives, property owners, tenants, and vendors to streamline communication and operational workflows.

- Produced business documentation, SOPs, and process documentation to standardize internal operations.
- Identified opportunities to automate repetitive administrative tasks, reducing manual effort and improving team productivity.

EDUCATION

Bachelor of Science in Computer Engineering

Cebu Institute of Technology – University

Cebu City, Philippines

2023

SKILLS

Core Technologies: Claude Code • n8n • REST APIs • Webhooks • Workflow Automation • Microsoft Power Platform • Flutter • JavaScript • Python • SQL • Power BI • MCP

- AI & Automation
 - Claude Code
 - Claude AI
 - ChatGPT
 - Google Gemini
 - AI Agents
 - Prompt Engineering
 - Model Context Protocol (MCP)
 - Workflow Automation
 - AI-Assisted Development
- Programming Languages
 - JavaScript
 - Python
 - Dart
 - C#
 - SQL
 - HTML
 - CSS
- Business Intelligence
 - Microsoft Power BI
 - Microsoft Excel (Advanced)
 - VBA Automation
 - Dashboard Development
 - Data Analytics
- Automation & Integration
 - REST APIs
 - Webhooks
 - API Integration
 - JSON
 - HTTP Requests
 - OAuth Authentication
 - Data Transformation
 - Business Process Automation
- Mobile & Web Development
 - Flutter
 - Responsive Web Development
 - RESTful API Integration
 - UI/UX Implementation
- Databases
 - Firebase
 - Supabase
 - MySQL
 - Microsoft SQL Server
- Cloud & Collaboration
 - Git
 - GitHub
 - Microsoft 365
 - SharePoint
 - OneDrive
